PH.D. FELLOWSHIPS IN NEUROGENIC LANGUAGE DISORDERS AT OHIO UNIVERSITY

Students with a keen interest in clinical research in neurogenic language disorders are invited to apply for an exceptional Fellowship opportunity. Neurogenic Language Disorders Fellows receive a minimum of three years of year-round full-time tuition expenses, plus an attractive living stipend (assuming satisfactory performance). Additional funds may be available to support continued studies beyond three years. Ph.D. Fellows may choose to engage in a variety of research project areas related to aphasia, dementia, special diagnostic problems related to language comprehension, use of eye tracking technology to study cognition and communication, and communication problems associated with diabetes.

The mentor for this special Fellowship opportunity is Brooke Hallowell, Ph.D., CCC-SLP, F-ASHA. Dr. Hallowell has had over 10 years of continuous federal research funding from the National Institutes of Health and the National Science Foundation and other agencies, has written numerous articles and book chapters, and has published several edited books. She is a worldwide featured speaker, consultant, and expert witness on the topic of aphasia and related disorders.

Dr. Hallowell has a strong track record of passionate mentoring of students and post-doctoral faculty members in research career development, including thoughtful experimental design, writing for publication, grant writing, teaching, and service to the profession. Her philosophy of Ph.D. student mentorship includes a strong commitment to personalized focus on each student. Additional excellent faculty members in the School provide further rich research and mentorship opportunities to Fellows.

QUALIFICATIONS Qualified applicants will have a strong interest in becoming increasingly independent scholars in neurogenic language disorders, a master's degree in an academically related area (e.g., communication sciences and disorders, psychology, neuroscience, biomedical engineering, etc.), and excellent written and interpersonal communication skills in American English. Fellowships are competitively awarded. US and International applicants are welcome, and applicants from underrepresented groups are encouraged to apply. View application and instructions at http://www.hhs.ohiou.edu/hsls/graduate_doctoral_programs.aspx.

ABOUT THE SCHOOL OF HEARING, SPEECH AND LANGUAGE SCIENCES

The School of Hearing, Speech and Language Sciences offers world-class doctoral programs. We are a diverse, energetic, dedicated, and productive faculty who work closely with students in a positive and encouraging environment. We offer students the opportunity to develop an individualized academic plan of study, access to state-of-the-art facilities and equipment, an exciting range of mentored research experiences, and a variety of mentored teaching opportunities.

Doctoral studies in Hearing, Speech and Language Sciences at Ohio University provide numerous distinctive opportunities, including:

- Involvement in research projects funded by prestigious agencies, such as the National Institutes of Health and the National Science Foundation.
- A choice of Ph.D. focal areas in hearing science, speech science, language science, audiology, and speech-language pathology.
- Hands-on guidance in vital areas of scholarly development, including publication and grant writing.
- Enriching collaborative experiences in medicine, psychology, neuroscience, cognition, psycholinguistics, linguistics, health sciences, physical therapy, education, engineering, biological sciences, statistics, and more.
- Rich University-wide interdisciplinary opportunities, including: Initiative on Health and Wellness in Underserved Populations, Appalachian Rural Health Institute and Diabetes Research Initiative, Initiative on Interactive Virtual Environments, NanoBioTechnology Initiative, and Gerontology Certificate Program, providing rich additional interdisciplinary research and student funding possibilities.
- Participation in the Institute for the Empirical Study of Language, facilitating research collaboration across many disciplines.
- Engagement with multicultural, multinational, and multilingual students and faculty.
- Access to vital clinical populations to support cutting-edge research programs.
- Participation in a university and local community that offers a safe, culturally vibrant and picturesque environment.
